

An Overview of the VE Program

Presented by: Wendy Schmitt, National Programs Manager

Agenda

- The Basics of VE
- About the Career Readiness Framework
- Features of the VE Experience
- Curriculum
- VE Program Implementation
- The Successful VE Student

The Basics of VE

- Students create and run their own businesses
- Classrooms become simulated work environments
- Students fill organizational roles such as CEO and HR Manager and serve as consumers for other VE businesses
- Teacher serves as a facilitator
- Business partners provide guidance, resources, curriculum development, opportunities and advocacy while connecting students to the real world of business

Why We Do It

- Allow students to experience the expectations of the workplace in a global economy
- Expose students to career pathways and a world of new opportunities
- Develop career readiness competencies: leadership, professional, functional, and core technology skills (guided by the Career Readiness Framework)
- Empower students to unleash their potential

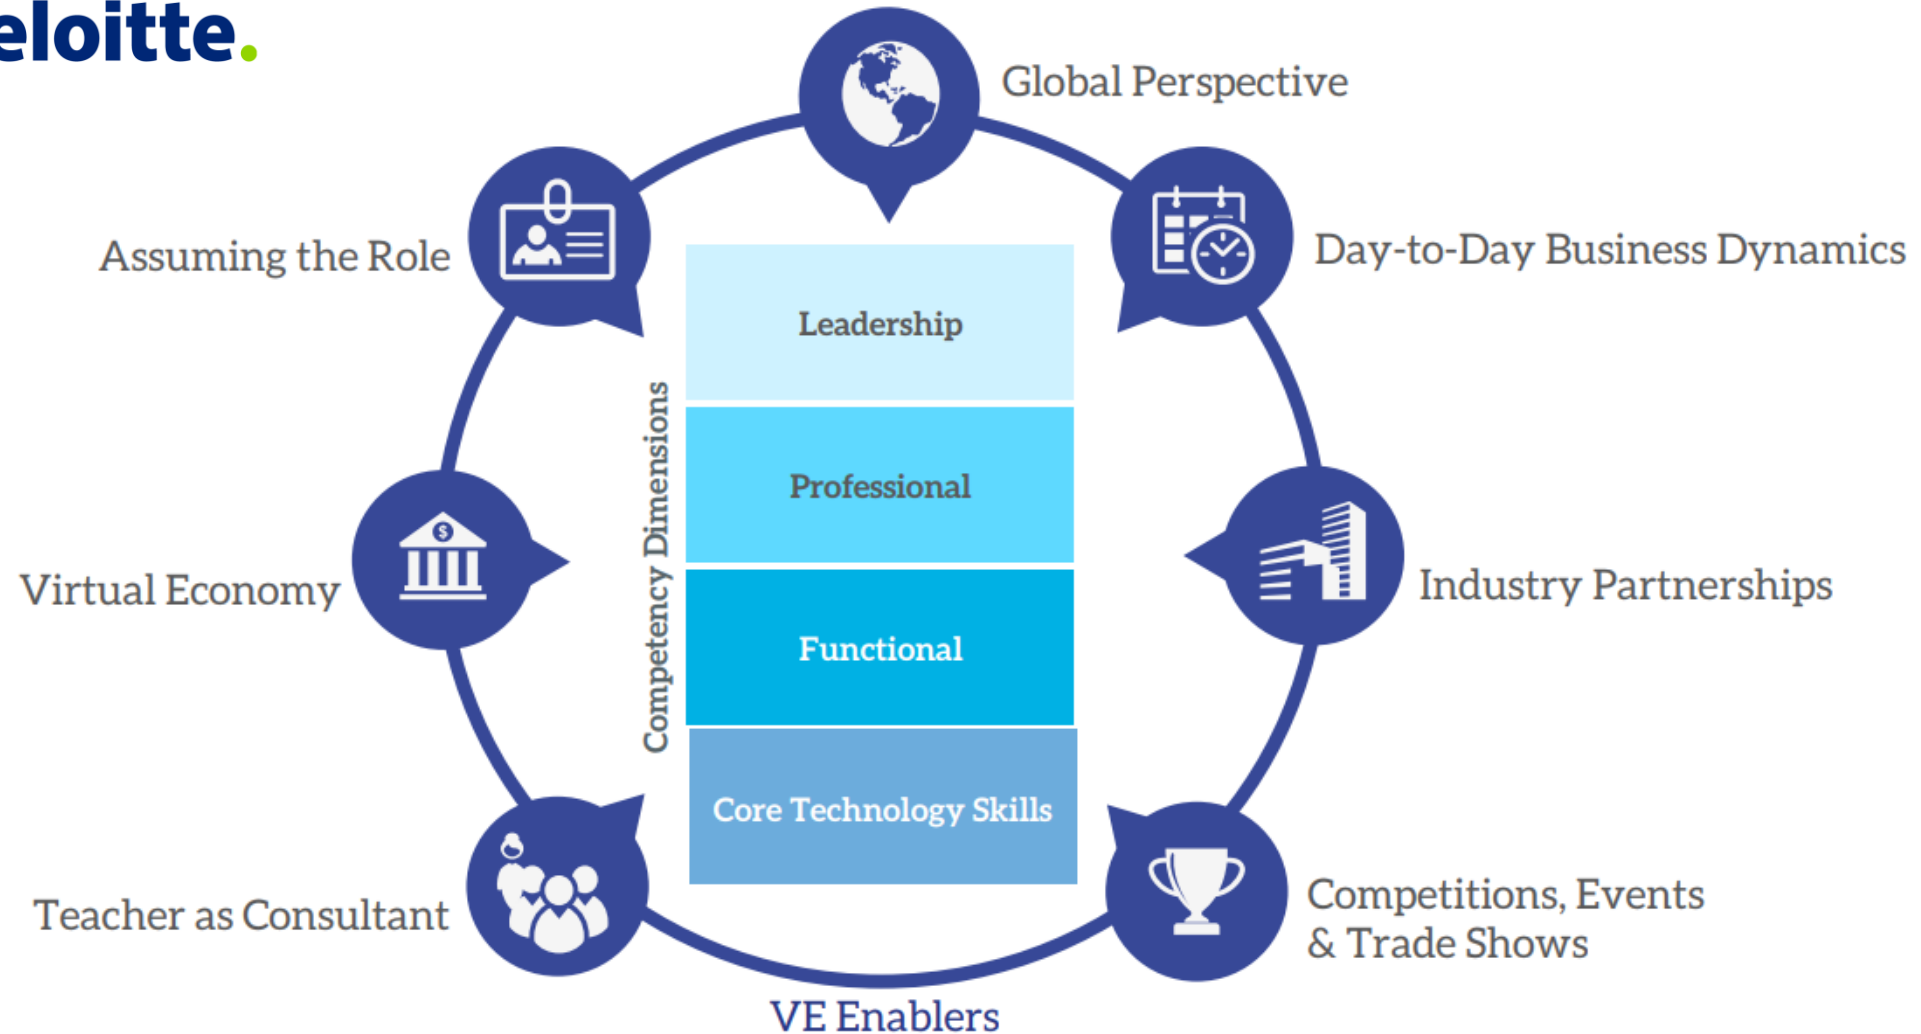

"I've never felt as empowered as I have during my year in VE. This is a program that uncovers our strengths and fuels our passions."

**Jasmine A., Thomas Jefferson
HS, Tampa, FL, Class of 2016**

Career Readiness Framework

Deloitte.

About the VE Career Readiness Framework

- Many students don't feel prepared for the working world. Students who do feel prepared for work may be less prepared than they realize. Or they may be prepared for work that no longer exists.
- The VE Career Readiness Framework identifies the competencies (or knowledge, skills, and abilities) students can develop that employers demand.
- Career readiness competencies allow employers to communicate their needs to educators and enable educators to understand how well students are prepared to meet these needs.
- Students who develop and can demonstrate career readiness competencies are those who are better positioned for success in the workplace.

Students Develop In-Demand Competencies

The full listing of competencies are found in the Career Readiness Framework

VE's curriculum is aligned to the Career Readiness Framework

Features of the VE Experience

Assuming the Role

Students interview for departments, such as Finance and Marketing, and roles, such as CEO, VP, and Associate. Throughout the year, they execute against role-specific goals and are evaluated against these expectations.

Virtual Economy

VE students buy and sell products and services, prepare their taxes, select insurance and retirement options, and experience financial market dynamics.

Teacher as Facilitator

VE is student-directed. There are no traditional lessons, and the teacher acts as an active observer and consultant. It's a shift from "sage on the stage" to "guide on the side"

Global Perspective

VE participants interface with students from around the world virtually throughout the program and in-person at the Trade Show, developing cross-cultural awareness.

Day-to-Day Business Dynamics

Students work individually, in departments, and as a firm to develop a strategy and plan and roll up their sleeves to implement it. Each firm develops a distinct culture and faces unique challenges.

Industry Partnerships

VE industry partners provide skills-based mentoring, serve as judges for business plan competitions, and offer internships to students.

Competitions & Events

Online and live competitions, regional and national conferences & exhibitions, workshops, and more provide opportunities for students to present their work and network with other VE firms.

The VE Curriculum

- The VE task-based curriculum is an applied-learning, project-based curriculum that reflects the action-learning approach and replicates the activities found in the workplace.
- The VE curriculum identifies the tasks that are necessary to establish and run an enterprise.
- All tasks and activities are supported by numerous resources (banking system, activity map, VE marketplace, online tools, readings, video, models, rubrics) and are delivered through the Canvas LMS and the VE Portal.
- A Pacing Guide is provided to help teachers roll out tasks to accomplish production of deliverables.
- A task-based curriculum delivered during the school day that aligns with the Common Career Technical Core standards and National Standards for Economics and Personal Finance.

SALES MATERIALS OVERVIEW

Each Virtual Enterprise Company is asked to design sales materials, such as a company brochure, catalog or promotional materials whose purpose is to promote visibility and improve sales. In order to create effective sales materials, various departments such as Marketing, Sales, and Design must work collaboratively to develop materials that are consistent with the mission and objectives of the company.

Submission Criteria

Sales materials should be submitted as a single PDF document and address the following themes. Samples may include one of the following: a catalog, brochure, direct mail campaign, and/or promotional materials.

- **Content:** Company information should be included on all sales materials in a manner which is professional and appropriate for a school environment. Information should include product/service descriptions and images, pricing, and an ordering process or next steps.
- **Design:** The presentation and design of any sales materials should creatively reflect the company, mission and logo. Sales materials should be free of any editorial, grammatical, and/or spelling errors.

Career Readiness Framework Alignment

Leadership:

- Demonstrates intrapreneurship
- Demonstrates well-rounded perspective and unique style
- Motivates others to act

Professional:

- Demonstrates professionalism
- Collaborates with others
- Communicates effectively
- Embraces diversity

Functional:

- Understands general business dynamics

Core Technology Skills:

- Department/function specific technology

Judging Criteria

Each element will be rated from 1 to 5 stars. A score of five is outstanding and a score of one needs significant improvement.

Content	To what degree are the sales materials comprehensive and consistent with the company's product(s)/service(s)?
Design	To what degree are the sales materials creatively and effectively designed? How well do they grab your attention?
Salesmanship	How compelling are the sales materials? How likely are you to conduct business with this company as a result of the materials?
Professionalism	To what degree are the sales materials presented in a professional manner? Are the materials free of spelling and grammatical errors?

Rubric

5 stars Well above standards	Outstanding execution: content and/or strategies are clear, comprehensive, thoughtful, and very well researched and/or developed.
4 stars Above standards	Well executed: content and/or strategies are evident and well researched and/or developed.
3 stars Meets standards	Includes essential components: content and/or strategies are evident; most components are researched and/or developed.
2 stars Below standards	Missing essential components: content and/or strategies are not evident or unclear; research and/or development are below standards.
1 star Well below standards	Major flaws or section missing.

How the Curriculum is Organized

- The Virtual Enterprise is organized into departments typically found in a business organization: Administration, Accounting/Finance, Human Resources, Sales/Marketing, Graphic Design/IT.
- Tasks are organized by these same departments and provide strategies for implementing the activity at hand.
- An orientation section precedes departmental tasks and includes activities that students must accomplish during the first few weeks of the school year when students may all work together or in small groups while they are introduced to the VE concept.
- Each task includes suggested strategies and resources that may be used by the facilitator to guide the activity.
- Tasks identify the following: VE Departments Involved, Time Frame/Month for Activity, Outcomes, Activities/Strategies, Internet Activity, Materials/Resources, Mastery and Assessment.

The VE Learning Approach

The Classroom Becomes a Workplace in VE

- An office instead of a classroom
- Networked computer workstations
- Workgroup clusters of furniture
- Conference table and chairs

Teacher as Facilitator

- VE is student-directed
- The teacher acts as an active observer and consultant.
- It's a shift from "sage on the stage" to "guide on the side"

Key VE Projects & Activities

- Elevator Pitch
- Business Plan
- Branding
- Employee Manual
- E-Commerce Website
- Newsletter
- Conferences & Exhibitions
- Video Commercial
- Annual Report

VE Portal

portal.veinternational.org

- **Firm Admin:** For administration such as managing student accounts, taking attendance, and setting up firm profile
- **US Network and International Banking:** Bank and trade as businesses and consumers
- **VE Store Manager:** Buy and sell products using student-made ecommerce websites
- **International Firm Directory:** Find VE firms from around the world
- **International Trade Resources:** Import/Export documentation and best practices

The screenshot displays the VE Portal interface. The top navigation bar includes links for Firm Admin, Firm bank account, Wholesale Marketplace, Store Manager, Firm Directory, and Teacher bank account. The left sidebar lists various curriculum categories, with 'Administration' currently selected. The main content area shows 'Administration Tasks' with a list of 18 tasks. An inset window displays the 'US Network Bank' account details for Tyler Fugazelle (Chapman Enterprises - PF Code 00011445).

Though accountants traditionally work on paper, as technology has progressed, accountants have turned to online programs to easily journalize transactions and create financial statements. Since my first day at Spectrum, I have ensured that the company uses **modern technology** in order to work as efficiently as we can. I, along with the accounting specialists, have used **Google Spreadsheets** to create our journals, organize payroll, make financial sheets, control inventory, and create invoices. We have utilized spreadsheets created by VE, as well as made our own, to ensure that we can effectively use *and* create financial sheets and journals online. Using online programs that compute equations automatically reduces mistakes that occur when inserting numbers into calculators. Additionally, we use **Google Drive** to organize documents into folders and utilize the **Spectrum email** to engage with other companies. My department will continue to use these online programs to not only prepare ourselves for future jobs that require technology efficiency, but also to ensure that we can get our work done accurately and on time. I believe that I have done a great job using my core technology skills because I use technology, such as the email and Google Drive, every day in class just like professional accountants.
