

TRANSFORMING STUDENTS INTO BUSINESS PROFESSIONALS

2014-15 ANNUAL REPORT

LETTER FROM THE EXECUTIVE DIRECTOR

Dear Friends,

The following Annual Report chronicles an amazing year of growth for Vei—our fourth as a national non-profit charged with scaling-up the live global business simulation that was first piloted in 1996 by the New York City Department of Education. Thanks to our growing community of partners and supporters, we invested \$1.6 million in transforming students into business professionals and entrepreneurs, unleashing talent and innovation among 11,000 students across 360 schools and 18 states. We've watched in awe as our students

have come up with incredible business ideas and worked tirelessly as a team of colleagues to meet their company's bottom line. We've been proud to follow Vei alumni as they start real businesses—drawing upon the skills and vision they developed in our program.

This past year has been one of bold new ventures for Vei. We piloted the **VE-JV Middle School Career Academy**, which we developed with support from the New York Life Foundation to create pathways for middle school students to become tech-savvy entrepreneurs. We brought another real-world element into our simulation through the **VEI Market Insights Tool**. Designed with support from Standard & Poor's, the tool provides our students with real-time analytics on Vei company and global economic performance. We gathered teachers from across the country for our first-ever **VEI Summer Teachers' Conference**. With funding from the James Irvine Foundation, we piloted our program as a strategy for meeting the goals of California's **Linked Learning Initiative**, a groundbreaking effort to integrate academics with work-based learning to prepare students for college and careers.

It takes a solid foundation for organizations to reach these kinds of new heights. For nearly two decades, we've witnessed the life-changing power of our program, which brings innovative and relevant learning to youth. We are proud to be looking ahead to celebrating our 20th anniversary in 2016, and grateful to the many educators, industry professionals, and business partners around the country that have made it possible for us to continue to grow as an organization. As we enter a new year, we plan to continue to think big and aim high, working with the business and education communities to engage with students and create a dynamic, diverse workforce for the rapidly-changing future.

Sincerely,

Iris Blanc
Executive Director

Ashley Fina
Board of Directors, Chair

ABOUT VEI

VEI transforms students into business professionals by bringing the workplace into the classroom.

VEI is a national educational nonprofit that transforms students into young professionals by giving them the opportunity to create and run business ventures in their classroom. We partner with educators, business leaders, and industry professionals to develop the best talent pipeline in the country. We currently serve 12,000 students across the U.S., many from underserved communities.

NEW INITIATIVES

VE-JV Middle School Career Academy

VEI is introducing a new era in middle school education with the launch of the VE-JV Career Academy, a two-year program that will enable 7th and 8th graders to develop technology and entrepreneurial skills by starting and managing business ventures. With support from the New York Life Foundation, VEI is piloting the VE-JV Career Academy in New York City public schools and three other cities.

Market Insights Tool

With funding from Standard and Poor's, VEI developed and released a web app that provides real-time analytics for key metrics within VEI's economy such as number and value of bank transactions, market categories and sizes, and company and national financial performance.

National Teachers' Conference

VEI ran our first-ever VEI Summer Teachers' Conference hosted at Long Island University C.W. Post, gathering together 80 teachers from more than 70 schools for a week of professional development, workshops, and networking.

VEI as an In-School Internship Model

With funding from the James Irvine Foundation, VEI partnered with four Linked Learning high schools in the Los Angeles Unified and Long Beach Unified School Districts to pilot VEI as an in-school internship model. Linked Learning integrates rigorous academics with career-based learning and real-world workplace experiences. Harder + Company conducted an independent evaluation of this VEI-Linked Learning pilot.

National Website Competition

Throughout the months of January and February, 347 active websites developed and managed by VEI firms received ratings and constructive feedback from a pool of 250 business mentors, educational administrators, and alumni.

Portal Updates

The Portal became the "homepage" of VEI, where students, teachers, and administrators find curriculum tasks and resources, the U.S. and international banking system, and other tools for participating in the VEI global business simulation.

BUILDING THE TALENT PIPELINE

Addressing a National Crisis

The most pressing issue facing U.S. employers is the talent crisis. While hiring managers are struggling to find the right people for their organizations¹, the latest Gallup polls show that 50% of Americans believe that students are leaving school unprepared for the workplace², lacking the professional skills and behaviors to be successful. Even students who are better equipped lack the time and space needed to experience entrepreneurship in a way that positions them to unleash their full potential along their career paths, whether as entrepreneurs or as “intrapreneurs” within a larger company. VEI tackles both issues by developing a talent pipeline of tech-savvy future business leaders and entrepreneurs prepared to fuel growth in diverse sectors of the economy.

Our Impact in 2014-15

As an in-school program that consistently produces strong results³, our model is poised to scale throughout the educational system to meet the biggest challenge in addressing career readiness: providing youth with in-depth work experience before they leave high school so that they can hit the ground running as young professionals.

97% of VEI students graduate from high school

77% of VEI students developed leadership skills

92% of VEI graduates enroll in college or trade school

77% of students say VEI made them feel more confident in their abilities

85% of VEI students learned to collaborate and work as part of a team

73% of students identified a career pathway of interest through VEI

83% of VEI students used technology as applied in business

AN EVENTFUL YEAR

Trade Shows

VEI offers students the opportunity to participate in local, regional, national, and international Trade Shows. Trade Shows are a central component of VEI's program and allow student businesses to exhibit and sell their products and services in a competitive marketplace, while bringing together VEI's network of educators and industry partners.

Business Plan Competitions

Business Plan Competitions are another major component of VEI's program. Each year, student companies are expected to develop and submit a written business plan and enter a local competition to present their plans to industry professionals and educators. Top-performing teams from around the country earn the chance to compete at regional competitions to qualify for the National Business Plan Competition, held each spring in New York City.

YOUTH BUSINESS SUMMIT

The Youth Business Summit is VEI's signature three-day event, offering students multiple opportunities to demonstrate their skills, knowledge and diverse talents in entrepreneurship, communications, technology, and global business management—key components of the VEI program.

Global Business Challenge | National Business Plan Competition | International Trade Show

The 2015 Youth Business Summit took place in New York City between April 13-15 and included the following three major events:

Global Business Challenge

Students work in multinational teams to identify the challenges, opportunities, and risks involved in a global business by examining a college-level business case study. After two hours of analysis and deliberation, teams present their findings to a panel of judges.

National Business Plan Competition

Students from across the country demonstrate their global business expertise through written business plans and oral presentations. The competition showcases best practices, rewards excellence, and allows students to apply sophisticated knowledge and skills attributed to business professionals and college students.

International Trade Show

Student businesses from around the world exhibit and sell their products and services in a competitive marketplace.

- **Participating States:** California, Florida, Illinois, Massachusetts, Michigan, New Jersey, New York, North Carolina, Pennsylvania, South Carolina, Tennessee, Texas, and Washington D.C.
- **Participating Countries:** Albania, Austria, Belgium, Brazil, Bulgaria, Germany, Indonesia, Israel, and Romania
- **Inspiring Keynote Speakers:** Vicky Free, EVP of Marketing and Chief Marketing Officer of BET Networks, delivered a keynote speech at the Global Business Challenge on how to thrive in business and Jim Donald, CEO of Extended Stay America and Former CEO of Starbucks, inspired students to find their "Fish Story" during the NBPC.
- **A First-Year Firm in First:** Life's PURiTEA of Byron Nelson HS from Trophy Club, Texas accomplished a rare feat for a first-year firm by becoming a first-place winner at the National Business Plan Competition.
- **State-of-the-Art Transactions:** U.S. Network Bank Credit Cards were used for the first time at the 4,000 participant, sold-out International Trade Show.

A CLOSER TEACHER COMMUNITY

Summer Teachers' Conference

Eighty new and returning VEI teachers from California, Illinois, Michigan, New Jersey, New York, North Carolina, South Carolina, Tennessee, and Texas attended our first-ever VEI Summer Teachers' Conference, which was hosted at Long Island University, C.W. Post Campus. Over 70 schools were represented as teachers participated in four days of networking, professional development, workshops, guest speakers, and partner events.

"As we started in August, I was more prepared to guide my students in our second year with VEI. I gained tremendous knowledge and great ideas not only from the amazing VEI staff but also from the many VEI teachers that I have met this past year. In just one year, I have seen VEI implement many positive changes and improvements, and a lot of the progress comes from getting feedback from VEI teachers. This process of communication makes VEI a successful venture and a stronger business model for students and teachers alike."

Darrel Iki, School of Business and Tourism, Los Angeles, CA

TEACHER TESTIMONIALS

"Every day VEI students demonstrate the passion that they have for their business, while exhibiting the leadership and professional skills that provide a stepping stone toward a successful future."

Soteria Stavroulakis, NYC Program Coordinator

"VEI gives students a true work-to-learn model of education. Each student in the program has a unique learning experience as they work in their specific role in the company. There is no other program like this anywhere in public education. I wish every kid could have this experience."

Alan Gersten, Century High School, Santa Ana, CA

"My favorite part of the VEI experience is seeing the growth in my students from the beginning of the year to the end. Students have an opportunity to fail in a safe environment and recognize that it is okay to fail, and learning from failure can be very valuable."

Kendra Lee, St. Charles North HS, St. Charles, IL and IL Program Coordinator

"I had students who had no idea what they wanted to do, students who could've been high-school dropouts, students from high means and low means, from all kinds of life. Now they're focused. They know what they want to do, they're prepared, and they can't wait to go out into the real-world. They started teaching me a few new things because they became so immersed in business."

Antonio Banos, Byron Nelson HS, Trophy Club, TX

"I love watching my students frantically strive to meet deadlines, increase market share, develop new products, and communicate with business people. VEI is a self-motivating program that keeps students engaged and eager to learn."

Amy Demchak, Westhampton Beach HS, Westhampton Beach, Long Island

"As a former business professional, I enjoy how much this class truly simulates the real business world. I feel privileged to be involved with a segment of education that I know is preparing students to be successful later in life. The 'golden egg' in education has already been discovered in VEI!"

Kathy McCoy, Bearden HS, Knoxville, TN

OUR PARTNERS & SUPPORTERS

Business Partners

Business partners play an integral role in the VEI experience inside and outside the classroom. In the classroom, industry professionals offer guidance and feedback aligned with their areas of business expertise as students plan, launch and grow their ventures. Outside the classroom, business partners inspire students to expand their business knowledge and help students hone their professional skills and workplace competencies by hosting them as interns and serving as competition judges, guest speakers and workshop facilitators at VEI events. In turn, VEI students serve as a valuable talent pipeline for the businesses that partner with us and for tomorrow's workforce.

Some of the partners we had the privilege of working with in 2014-15:

Third Annual Evening to Benefit Virtual Enterprises International

On April 15, over 400 supporters from the business and education communities packed Tribeca Rooftop to celebrate VEI's efforts to drive the future of business and innovation. VEI students presented their businesses and shared their personal stories of transformation. VEI honored **HSBC** with the Global Citizen Award, **Harold "Terry" McGraw III**, Chairman of the Board of McGraw Hill Financial, with the Crystal Leadership Award, and **Dr. Kimberly Cline**, President of Long Island University, with the Dr. Noel N. Kriftcher Service to Education Award. New York Life Foundation presented a \$1 million check to VEI to pilot the VE Junior Ventures Middle School Career Academy.

FROM OUR BUSINESS PARTNERS

"VEI students are the leaders of tomorrow. They are providing innovative ideas and solutions to business challenges that people who have been in business haven't even thought about. What makes VEI unique is that it's a true partnership among the superintendent, the school district, the principal, the teacher, the student, and, of course, the parents."

Ray Johnson, VP, Corporate Sustainability, HSBC Bank USA, N.A.

"When I found out about VEI, it told the story of my life as an entrepreneur. I wish I had this type of learning when I was in high school."

Jeffrey C. Taylor, Co-Founder & Managing Partner, Digital Risk, LLC

"I've judged the Business Plan Competition and Trade Show. When you think about what the students are learning—from developing a business concept to marketing that business to other students—it's what they're going to need in college and in life."

Dr. Kimberly Cline, President, Long Island University

"We want to bring VEI students on as interns, follow them through college, and bring them on as future Viacom employees. The students are very curious about our industry and appreciative of our efforts."

Fukiko Ogisu, Senior VP, Viacom

"We see more and more that our customers aren't able to find the talent they need to support their business. VEI is preparing students for their future, allowing them to find college and career paths of their choice."

Ashley Fina, President, Michael C. Fina & Company

"I'm a two-time judge and I've had a great time working with the kids, talking with them, mentoring them, and learning from them. VEI is creating lots of value for the students, the schools, and the community at large, and I'm proud to be part of it."

Joshua B. Siegel, General Partner, Rubicon Venture Capital

FROM OUR CLASS OF 2015

"My VEI experience was amazing. It taught me how to be a leader and how to influence others. It gave me the opportunity to figure out at a young age how the real world works."

Summer Cruz, Richmond Hill High School, Richmond Hill, New York

"Before VEI I was scared to go to college and grow up, but now I am confident that I will have a bright future. I can now say that I am not afraid to get up in front of a crowd and present. In many ways I would not be the person I am today without VEI."

Mikayla Dunn, Laingsburg High School, Laingsburg, Michigan

"VEI let me practice the skills I learned taking other classes and it showed me real-world applications to what I want to do after college."

Brennen Hayes, Spartanburg High School, Spartanburg, South Carolina

"VEI was a great opportunity to express my talents while building a strong team as well as friendships."

Damon Lanum, Northwest High School, Justin, Texas

"I had quite an extraordinary experience with VEI. I have faced many challenges and obstacles in this program that helped me grow into a successful young woman ready to take on the corporate professional world. It was a very humbling experience that I feel grateful to have been a part of."

Kayla Adams, The High School of Fashion Industries, New York, New York

"VEI opened my eyes to the endless possibilities that the business world has to offer. I never realized all that goes into taking an idea and developing it into a fully-functioning business. It motivated me."

Nicholas Kallas, Elmwood Park High School, Elmwood Park, Illinois
