Judge Competitions

Use your industry experience and deep understanding of current industry practices to evaluate and give our students valuable feedback on their work.

Competitions take place both virtually and in-person across the country. They test students' business acumen as well as their professional, presentation, and research skills.

Volunteer individually or as a corporate team to evaluate business plan, marketing plan, website, elevator pitch, and company newsletter competitions, social media marketing strategies, and much more!

VE provides judge training resources for competition and event judging.
